Personal Summary

I'm a Senior Software Engineer at Haptiq, where I lead teams to build scalable, high-quality solutions. With strong experience in the MERN stack, I enjoy solving problems, improving processes, and working closely with others to bring ideas to life. My focus is always on delivering results that align with business goals while helping the team grow and succeed together.

Experiences

Projects

Neura Lens: *Sep 2025 - Present*
A smart mobile app that lets you capture or select images, automatically compress and upload them to the cloud, and uses AI to detect objects in your photos. Metadata like device info and network details are also securely saved. Built with React Native, Expo, NestJS, MongoDB, and AWS S3, it's fast, intelligent, and user-friendly.

Newbie Horse Racing: *Jul 2025 - Present*
- Associated with Haptiq
A beginner-friendly platform by the Daily Racing Form that simplifies horse racing for newcomers. It offers an intuitive interface with clear explanations, helping users understand race data and place bets with confidence.

Influencer Marketing Portal: *Aug 2019 - Oct 2021*
- Associated with Skreem Technology Pvt Ltd
Influencer Brand Collaboration Portal, A streamlined platform designed to facilitate seamless partnerships between influencers and brands. It empowers brands to execute campaigns efficiently on skreem web application, manage influencer relationships, and track campaign performances, all in one place. It transforms influencer marketing into a strategic, data-driven process.
