Professional Summary

Full-Stack Software Engineer and Team Lead with 7+ years of experience designing, building, and scaling production-grade web applications using Node.js, React.js, MongoDB, PostgreSQL, Redis, and AWS. Strong backend foundation in REST API development, database design, caching, and cloud-based application development, complemented by recent experience leading frontend modernisation initiatives and engineering teams. Proven track record of architecting scalable solutions, delivering high-impact products serving 500K+ users, and contributing across the entire application stack from backend services and cloud integrations to frontend architecture and performance optimisation.

Technical Skills

Backend: Node.js, Express.js, NestJS, REST API Design, API Performance Optimisation

Backend Architectures: Monoliths, Microservices, Layered Architecture, Event-Driven Architecture, Serverless Architecture

Messaging & Streaming: Apache Kafka, BullMQ

Database & Caching: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps: AWS (S3, Lambda, ECS Fargate, ECR, IAM, Secret Manager), Kubernetes, Docker, CI/CD

Frontend: React.js, Preact, Next.js, Performance Optimisation, Context API, React Hooks, AngularJS

Frontend Architectures: Micro Frontends, Component-Based Architecture, Compound Component Pattern

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

AI & GenAI: Prompt Engineering, LLM Integration, RAG Pipeline, AI-Powered Application

AI Engineering Tools: Claude Code, GitHub Copilot

Work Experience

Haptiq Labs (formerly Webonise Lab) | Pune | Senior Software Engineer | Jan 2025 – Jul 2026

Skills: JavaScript, TypeScript, AWS Lambda, React, AngularJS, Context API, Hooks, Micro Frontends, Node.js, MicroServices, API Gateway, Docker, CI/CD Pipeline, Agile Methodology, Version Control

- Promoted to **Team Lead** and **led a cross-functional team of 7 engineers** across frontend, backend, and UI disciplines, driving sprint planning, technical grooming, release management, and hiring activities.
- Designed and delivered **Horse Watch, an app-agnostic micro frontend platform** enabling runtime integration, API contracts, and independent deployments across React and legacy web applications.
- Architected the real-time communication layer for Horse Watch using **leader election with Web Locks API and BroadcastChannel**, enabling cross-tab SSE synchronisation, **reducing backend connections from $O(n)$ to $O(1)$** , and providing seamless failover.
- Spearheaded development and **launch of Newbie**, a greenfield application built with Preact, owning delivery from architecture through Phase-1 release.

Webonise Lab | Pune | Senior Software Engineer | Apr 2023 – Dec 2024

Skills: JavaScript, TypeScript, React, Micro Frontends, Component Architecture, Performance Optimisation

- Modernised a large-scale, high-traffic application by **migrating 100+ class-based** React components from React 16 to React 18 while maintaining uninterrupted feature delivery.

- Improved application performance by **introducing progressive data-loading strategies**, reducing initial page load time on key product pages by **approximately 3 seconds**.
- Transformed multiple legacy PHP and Backbone.js applications into scalable React-based platforms, improving maintainability, user experience, and long-term extensibility.

Pracemo Global Solutions | Pune | Software Consultant | Oct 2021 – Mar 2023

Skills: JavaScript, Node.js, Microservices, Redis Cache, PostgreSQL, AngularJS, REST API, Agile, Kubernetes

- Designed and developed **scalable backend REST APIs** using Node.js and Express.js for customer-facing applications at **Ather Energy**.
- Built and maintained backend services following **layered architecture principles**, focusing on clean business logic separation, maintainability, and performance.
- Optimised API workflows and backend processes to improve application scalability, reliability, and operational efficiency.
- Collaborated with cross-functional engineering teams to design and deliver backend solutions aligned with business requirements and system architecture.

Skreem Technology | Bengaluru | Associate Software Engineer | Sep 2019 – Oct 2021

Skills: JavaScript, Node.js, Monolithic, MongoDB, REST API, AWS S3, BullMQ Job Scheduling, Apache Kafka

- Designed and developed backend services and **REST APIs using Node.js**, Express.js, and **MongoDB** to support **influencer-brand collaboration, campaign management**, and reporting workflows.
- Implemented **Redis-based caching and BullMQ-powered background job processing** to improve asynchronous task execution, application performance, and scalability.
- Developed scalable backend modules for user management, campaign workflows, and data processing while ensuring code quality and maintainability.
- Collaborated with frontend and product teams to deliver reliable end-to-end features across the complete software development lifecycle.

Artomate Studio | Bengaluru | Web Developer | Aug 2018 – Apr 2019

Skills: PHP (Laravel, CodeIgniter), Ajax, JavaScript, HTML5, CSS3, MySQL, MVC Architecture

- Developed **full-stack web applications** using JavaScript, PHP, HTML, CSS, and MySQL, delivering end-to-end features from backend functionality to responsive user interfaces.
- Collaborated directly with clients to gather business requirements, translate them into technical solutions, and deliver production-ready web applications.

Technical Projects

Haptiq Labs / Webonise Lab — Client: Daily Racing Form (DRF)

Horse Watch | Jan 2026 - Jul 2026

Reusable micro frontend platform integrated across multiple DRF web applications, enabling independent deployments and shared feature delivery.

Key Technologies: ReactJS, JavaScript, Micro Frontend, REST APIs Integration, AWS S3 (build pipeline configuration), Jenkins, Leader Election Pattern, Broadcast Channel & Web Lock API, Server-Sent Events

Newbie | Jul 2025 - Dec 2025

Greenfield web application designed to onboard new users into the DRF ecosystem with a lightweight and responsive frontend architecture.

Key Technologies: Preact, JavaScript, REST APIs Integration, Component Based Architecture

DRF Portal | Apr 2023 – Dec 2024

Modernized the Daily Racing Form (DRF) platform by migrating legacy React 16 class components and PHP/Backbone.js applications to scalable React-based solutions. Delivered key initiatives across Member Center, Entries, while introducing progressive data loading and frontend performance optimisations for a platform serving 100K+ users.

Key Technologies: React.js, JavaScript, REST APIs, React 18, Code Splitting, Lazy Loading, Dynamic Imports, Component-Based Architecture, Performance Optimisation

Pracemo Global Solutions — Client: Ather Energy

User CRM Tool | Oct 2021 – Mar 2023

Developed a customer-facing User CRM platform for managing user-related workflows, integrating with Salesforce APIs for customer data and operations. Contributed across the frontend and backend, building Angular-based interfaces and Node.js services with REST API integrations.

Key Technologies: AngularJS, JavaScript, Node.js, Salesforce APIs, PostgreSQL, Microservices

Skreem Technologies — Own Product

Influencer-Brand Collaboration Portal | Sep 2019 – Oct 2021

Built and maintained a platform connecting brands with influencers, supporting campaign creation, influencer collaboration, user management, and campaign reporting workflows. Contributed primarily to backend services and REST APIs, using MongoDB for application data and Redis/BullMQ for caching and asynchronous background processing.

Key Technologies: Node.js, Express.js, JavaScript, MongoDB, REST APIs, Redis, BullMQ, AWS S3, Background Job Processing

Self-Learning Project

NeuraLens | AI-powered Mobile Application | Sept 2025 – Oct 2025

Built a cross-platform AI-powered mobile application using React Native and Expo, enabling users to capture or upload images for intelligent analysis. Developed backend REST APIs with NestJS and MongoDB to manage image processing, metadata, and cloud storage workflows. Integrated secure AWS S3 uploads using pre-signed URLs, image compression, and scalable media management. Leveraged Llama 4 Maverick to deliver AI-powered image insights from image capture through analysis.

Key Technologies: React Native (Expo), NestJS, Node.js, JavaScript, TypeScript, NestJs, MongoDB, REST APIs, AWS S3 (Pre-signed URLs), Docker, OpenRouter, Llama 4 Maverick (Model Integration)

Education

Master of Computer Applications

Indira Gandhi National Open University | Jul 2016 - Jun 2018 | Lucknow, India | Percentage - 63%

Bachelor of Computer Applications

Indira Gandhi National Open University | Jul 2013 - Jun 2016 | Lucknow, India | Percentage - 61%
